"OF CONCEPT"

DIBAKAR PAL

Retired Executive Magistrate (Civil Servant) & PhD Student, Department of Business Management University of Calcutta, India

Abstract

All is concept. What is thought is a concept. What is not thought is also a concept. Thus, what is beyond imagination and cannot be thought right now is also a concept. A person may say something which seems to be impossible at present. All may laugh at the concept. In this case the person argues that the present-day scholars have lack of knowledge. As such they cannot perceive it. The scholars of future generation will prove this obscure assumption.

Introduction

Creative writing is based more on manifestation rather than on expression. It does not inform rather reveals, so it bears no reference. The best creative writing is critical, and the best critical writing is creative. The present article is the outcome of creative writing meant for lay readers. As such free style is the methodology adopted so that the pleasure of reading can be enjoyed by the common mass. As you know well that, Francis Bacon (1561-1626), the immortal writer, wrote many essays, and notably "Of Love", "Of Friendship", "Of Ambition", "Of Studies", etc. The myriad-minded genius rightly pointed out that all the words of the dictionary can be the themes of essays one can write. But little has been done, in this regard since his death, in order to finish his unfinished monumental works. In fact, Bacon's way of presentation and his unique style kindled imagination and inspired me to write essays, in the light of creative writing, thus to get relief through Catharsis.

Of Concept:

Concept is classical Latin *conceptum* that which is conceived, fetus, that which is conceived in the mind, idea, use as noun of neuter of past participle of *concipere*. It is of Mid 16th century and from Latin

sēptum, alternative form of *saeptum* ("enclosure, hedge, fence"), from *saeptus*, perfect passive participle of *saepiō* ("hedge in, enclose"). *Con* means 'with'. Latin *conceptus* is 'enclose with.' Thus, *conceptus* is an idea or a principle relating to something abstract. It is a general notion or idea. It implies conception. It is an idea of something formed by mentally combining all its characteristics or particulars. It is a construct. This construction is meant for rendering abstract into concrete. *Conceptus* is an idea of a class of objects. It is an idea or thought, especially a generalised idea of a thing or class of things. It implies abstract notion. It is invention e.g., a new concept in caravans. It is an abstract idea e.g., the concept of evolution. It is an idea or invention to help sell or publicize a commodity e.g., a new concept in swimwear. Philosophically it is an idea or mental picture of a group or class of objects formed by combining all their aspects. *Conceptus* is something conceived. It is origin of *conceptus* which medically, means the product of conception in the womb, especially, the embryo in the early stages of pregnancy. Thus, *conception* implies fertilization of an ovum. It is specific, an embryo or foetus. It means inception of pregnancy. It means origination or beginning. *Conception* is the beginning of some

process, chain of events, etc. It is the act, process, or power of encompassing mentally. It implies formulation of ideas, especially of abstractions. It is a mental impression. It is an original idea, design, plan, etc. For example, satellite is the conception of a genius. It is the act or power of forming notions, ideas, or concepts. It is the formation, or power of forming in the mind, of a concept, plan, thought, etc. It is merely a fancy. It is a plan. It is a thing conceived, especially in some seaweed. Conception is conceiving or being conceived. The moment of conception is very vital. At that crucial moment the genius should not be disturbed, lest the imagination disappears. An unplanned conception offers no return at all. Brainstorming produces many new conceptions. During war, conceptions of many deadly weapons are invented. It is the forming of a basic idea. A plan, brilliant in its conception, fails because of inadequate funding. Conception is an idea, a plan or an intention. For example, Marx's conception of social justice is a revolutionary tool to the communist. A honeymoon couple, who trots in the galaxy of romance, has no conception of how difficult it is to be with a baby all day. Conception is the act or an instance of conceiving the process of being conceived. It is the faculty of conceiving in the mind. It is apprehension. It is imagination. It is an idea or plan, especially as being new or daring. Conception is an understanding, ability to imagine. Vague idea produces no conception at all. Weak imagination offers weak conception which is volatile in nature. Faculty of mind plays the vital role for the formation of conception. Some fashionable people live with style die with style. Even they dream in style. They cannot think anything without any style. They argue that life is once. As such drink life to the lees. So, whatever you do, you do in style. And if possible do anything with rare individual style. Thus, they advise to do anything in unique style. Uniqueness is their style. They are the worshippers of uniqueness. They are so bold. They are so creative. They are so daring. They are so dare devil. They are so stylish. They bother with no one's opinion of themselves. They ignore criticism. They opine that he who cannot be sophisticated like they are is worth criticizing. To them style is their whole conception. Thus, they enjoy living in style. Another school of thought contends that live as you like. To this group having no upper-class aesthetic style is the conception, which is just the opposite of the former one. To them the concept no style is also a style. Similarly, no politics is also a politics, or no statistics is also a statistics or nothingness implies possessing zero things as well. Thus, no conception is also a conception. Vague concept is also a concept.

Baseless concept is also a concept. Right concept is also a concept. Wrong concept is also a concept. Right or wrong is not the factor all are concept having equal status. Democracy is a concept. In democracy the one person one vote is a concept. Here, rich or poor, high birth or low birth, elite or proletariat enjoy equal voting right. Similarly, all presidents of the nations are equal and at par. Here the concept is that power or economy is not the base factor. Designation is the concept. Limitation is not the factor. They say every president of every nation gets a Swiss bank account by default. Such instant wealth is a enviable concept to those who cannot be the president. Conceptual refers to mental conception or concepts. Conceptualize is to form an idea of something in one's mind. It is to establish a conceptual framework within which to consider the issues. It is to think abstractly. Conceptual art is an art in which the idea or concept is considered more important than the finished product, if such exists. The notion goes back to Marcel Duchamp but became a recognized phenomenon in the 1900s. Typical manifestations include maps, diagrams, photography, and video. Conceptualism, as per philosophy, is the theory that universals exist, but only as concepts in the mind. Conceptualism is the doctrine, intermediate between nominalism and realism, which universals exist explicitly in the mind as concepts, and implicitly in things as shared qualities. Conceptacle is a receptacle. It is a reproductive cavity. As per botany it is a sac opening outward and containing reproductive cells, found in some brown algae. Biologically, it is an organ or cavity enclosing reproductive bodies. Conceptus is the entire product of conception until birth, including the sac, cord, and placenta. Conceptionist is a nun of an order founded in Portugal in 1489 in honour of the Immaculate Conception. Conceptious implies fruitful. All is concept. What is thought is a concept. What is not thought is also a concept. Thus, what is beyond imagination and cannot be thought right now is also a concept. A person may say something which seems to be impossible at present. All may laugh at the concept. In this case the person argues that the present-day scholars have lack of knowledge. As such they cannot perceive it. The scholars of future generation will prove this obscure assumption. The concept of community care is not new. A dull-headed student cannot grasp the basic concepts of mathematics. The concept that everyone should have an equal opportunity is an unattainable ideal. A whole new concept in English language teaching is very important. The concept of the atom was a revolution. The concept of God is a blessing to the theist. The Darwinian concept of evolution advanced

the civilisation to a great extent. A new concept in aerospace engineering advanced the civilisation to a great extent. A basic conceptual difference gives birth to new subject. One may not have conception of what it might lead to. A man with great power of conception is honoured everywhere and by everybody as well. Infinity is an immense concept. Similarly, zero or nothingness is another big concept. The concept of both zero and infinity are beyond perception. Mundane and divine are two concepts. The layman thinks for mundane, wise for divine. Belief or disbelief both are conception. Both god and ghosts are conceptions and do not exist. But man is afraid of both. Thus, nonexistence exists in disguise of fear. Unknown is their power. The conception is that the capacity of both god and ghost is immense but unknown. Here unknown concept creates suspense. Imagination is the base material of concept. It is the chief ingredient of conception. Original conception proves the solvency of mind. Someone may not have any conception of what it entails. Apprehension and imagination are

synonymous. Optimism and pessimism are two diagonally opposite concepts. Two persons may have identical conception simultaneously. It is due to the fact that, "great men think alike". Again, two persons may have different conceptions on an identical matter. This difference provides the reason is that we say, "Many people, many minds." The ability to hold two mutually contradictory thoughts under consideration at once is the sign of a complex thinker. Hypothesis is the root or outcome of concept. A proved hypothesis is called theory. Concept and emotion have similarity. None of them obeys any rule. Rather they break all barriers and cross all boundaries with their violent imaginative force. A dream does not die even after death of the dreamer. Similar is the concept. Man is mortal. A man dies. But his concept remains alive.
